There are three dive sites in total where you can dive in caves: Cueva Colon, Cala Braffi, and Cala Fe. The unique light reflections make it worth glancing toward the surface time and again while diving. Here, you can observe animal and plant species that shy away from light. Overall, diving in caves—with their altered lighting conditions—is ideal preparation for cave diving.

Description

There are three dive sites in total where you can dive in caves: Cueva Colon, Cala Braffi, and Cala Fe. The unique light reflections make it worth glancing toward the surface time and again while diving. Here, you can observe animal and plant species that shy away from light. Overall, diving in caves—with their altered lighting conditions—is ideal preparation for cave diving. The underwater landscape, as well as the flora and fauna at the light boundary, are truly fascinating. This is where backlighting specialists among underwater videographers and photographers really get to show their skills.
