HIGHLIGHT

The Pandora Reef. This large reef extends beneath the ocean's surface for a length of approximately 3.5 km. The northern tip and the southern drop-off are the main dive sites. Dives here often feature surgeonfish, jackfish, schools of hammerhead sharks, tuna, and large barracuda. The steep walls are covered with black coral, where the whitetip reef shark likes to sleep.

Description

The Pandora Reef.

This large reef extends beneath the ocean's surface for a length of approximately 3.5 km. The northern tip and the southern drop-off are the main dive sites. Dives here often feature surgeonfish, jackfish, schools of hammerhead sharks, tuna, and large barracuda.

The steep walls are covered with black coral, where the whitetip reef shark likes to sleep. A special highlight is being greeted by dolphins as you surface.
