HIGHLIGHT

Middle Reef offers an extensive reef area! It's like a labyrinth of hard coral colonies, and on the southeast side, the reef—with its many openings and holes—resembles Swiss cheese. Toward the south, the coral garden slopes gently down to a depth of 25 meters. The outer edges are ideal for drift dives.

Description

Middle Reef offers an extensive reef area! It's like a labyrinth of hard coral colonies, and on the southeast side, the reef—with its many openings and holes—resembles Swiss cheese. Toward the south, the coral garden slopes gently down to a depth of 25 meters. The outer edges are ideal for drift dives. The reef is famous for its hard and porous coral formations and its impressive coral landscape. In the Coral Garden, you can marvel at sweetlips, sea turtles, filefish, and red-toothed triggerfish.
